Imaging Systems

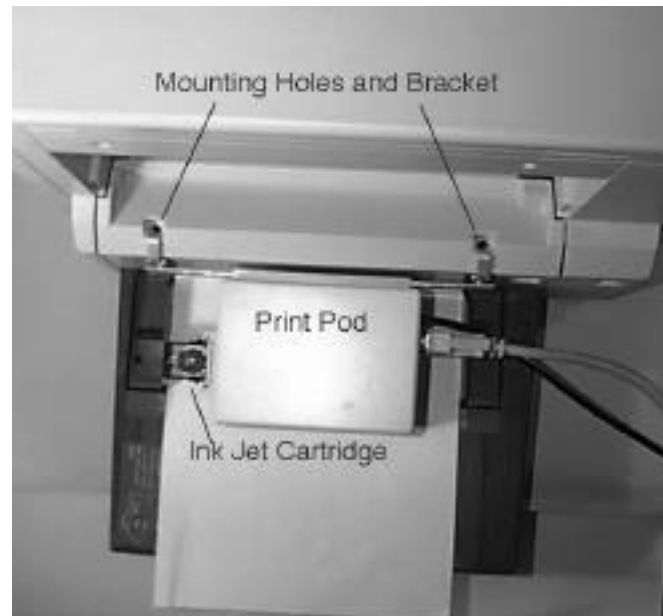

Installation Procedure

1. Install the Print Pod and Slide Bracket

- a) Slide the back of the Print Pod onto about the middle of the Slide Bracket.

- b) Hang the Slide Bracket into the Mounting Holes on the Panasonic scanner. Please ensure that the Slide Bracket is inserted as far down as possible into the Mounting Holes.

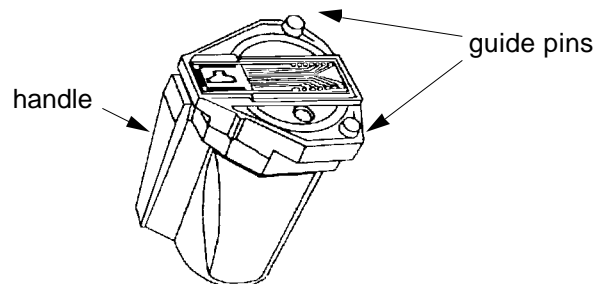

View looking down from the top

2. Connect the cables.

- a) Connect the Print Pod cable between the DB-25 on the IJL/3 Controller and the side of the Print Pod.
- b) Connect the communications cable between the DB-9 on the IJL/3 Controller and the RS-422 or RS-232 port of the host computer.
- c) Connect the wall mount power transformer to the power connector on the Controller. Plug the Print Pod power cable into a wall socket (powers the air heater).

3. Install an Ink Jet Cartridge.

- a) Holding the ink cartridge by the small handle, insert it into the clip in the Print Pod. The two guide pins should be facing down, and should line up with two holes in the clip. Then flip down the flat handle on the clip to secure the cartridge.
- b) To replace an empty cartridge, simply flip up the flat lever on the clip to release the cartridge.

Completed installation

- c) If the optional ink jet labeler has been idle for more than one day, gently blot the surface of the print head with a soft tissue or rag. Ink should wick up into the tissue. If jets appear to be clogged, try cleaning or priming the cartridge. Symptoms of a clogged print head jet are missing dots in the characters, especially a whole row of missing dots. If accumulated or dry ink builds up on the silver plate of the ink cartridge, blot it gently with a tissue. Prime the cartridge by pushing on the ink bladder with a paper clip until ink fully covers the silver plate. Then allow the ink to absorb back into the cartridge. Blot any excess ink off with a tissue.

4. Adjust the Print Pod position.

Gently slide the Print Pod to the left until the Ink Jet Cartridge is positioned over the edge of the paper. Documents will be endorsed at this location.

Shipping List

Item	Qty	Description	Part number
1	1	IJL/3 Controller, includes wall mount power supply.	AS013
2	1	Print Pod for Panasonic.	AS025
3	1	Slide Bracket.	ME0511
4	1	Ink Jet cartridge. May be already installed in Print Pod.	ACC-201 (black)
5	1	External Print Pod cable, 3' shielded 25 conductor DB-25 male to female.	CA003
In addition to the above, the system integrator must supply:			
6	1	External communications cable, DB-9 to host computer cable.	CPU specific
